Prioritizing Security and Protection in Every Way with LogiNext

What sets LogiNext apart in providing world-class security to our customers?

More than

70%

of organizations now see public clouds as more secure than on-premises systems.

Top Security Focus Areas by LogiNext

- Security governance
- Audit and compliance
- Business resilience
- Cyber defense
- Threat and risk assessment
- Global physical security
- DevSecOps

Diving deep to understand how LogiNext's Security offers a safer environment for customers in every possible way

LogiNext offers DevSecOps (Development, Security, and Operations) to integrate security initiatives at every stage of the software development lifecycle to deliver robust and secure applications.

Data Encryption

Our encryption mantle envelops data, both in transit and at rest, employing the most sophisticated cryptographic methodologies to defy prying eyes.

Access Control

Stringent access control measures manifest, permitting ingress solely to the sanctum of authorized personnel while meticulously safeguarding sensitive data.

Static Application Security Testing (SAST)

Our codebase undergoes a relentless barrage of SAST analysis, exposing latent vulnerabilities and precluding security chasms pre-deployment.

Dynamic Application Security Testing (DAST)

Continuous DAST assessments scrutinize our applications, proactively eradicating potential security vulnerabilities and fortifying digital citadels.

Software Composition Analysis (SCA)

Unceasing vigilance governs our third-party component landscape, facilitating prompt identification and mitigation of vulnerabilities in the software supply chain.

OWASP Top 10

We intricately align our security fabric with the OWASP Top 10, resolutely targeting the apex of web application security risks.

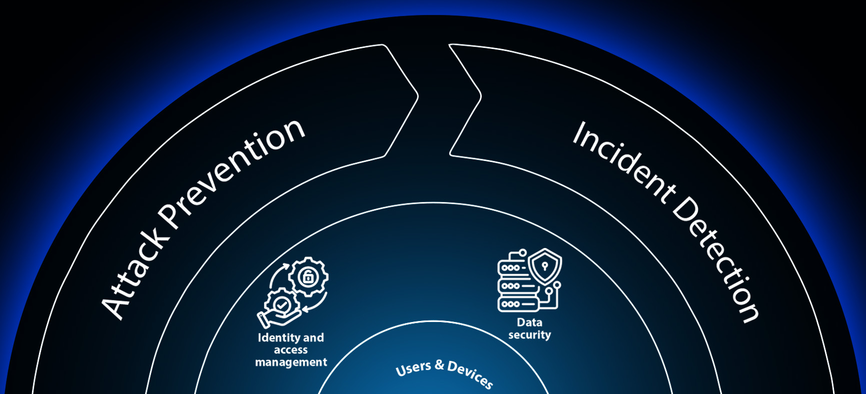
AWS Powered

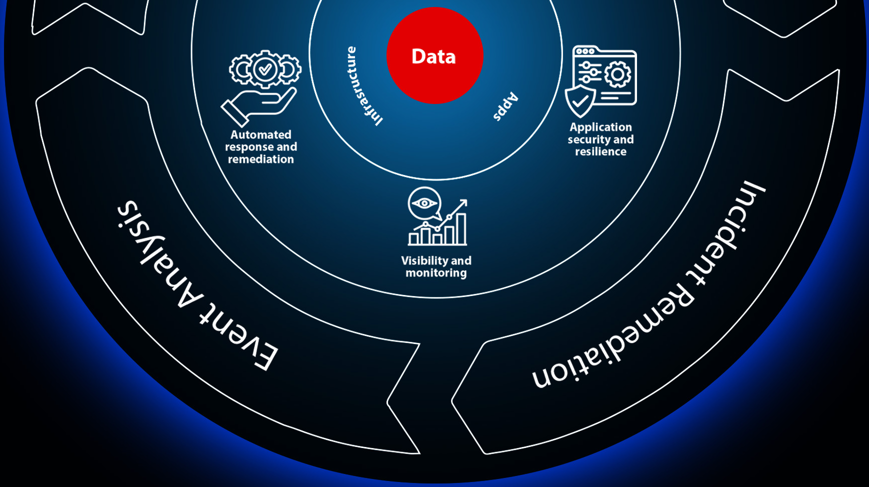
Our security posture is bolstered through the tenets of Amazon Web Services (AWS), an impenetrable fortress that enhances our digital resiliency.

Additional Features Focusing on Seamless Support for Customers

- Continuous Monitoring
- Security Patch Management
- Redundancy and Disaster Recovery
- Security Education and Training
- Vulnerability Assessment & Penetration Testing

Why LogiNext?





Data
Infrastructure
Apps
Automated response and remediation
Application security and resilience
Visibility and monitoring
Event Analysis
Incident Remediation
