operations

Did you know?

Up to 40% less time is spent on dispatch planning by businesses that use dispatch automation software, allowing teams to concentrate on growing rather than rushing.

Industry Challenge:

Ineffective Manual Scheduling

Solution offered

Factoring traffic, delivery time windows, vehicle load capacities, driver skillsets and customer preferences, automated dispatch software makes less error

Outcome

25%

improvement in scheduling efficiency.

Industry Challenge

Real-Time Visibility

Solution offered

LogiNext dispatch automation software has the ability to provide live updates on driver location, job status ETA and route deviations.

Outcome

30%

improvement in visibility.

Industry Challenge

Resource Utilization

Solution offered

LogiNext advanced SCVS platforms use predictive analytics to forecast potential risks, inventory shortages, and demand fluctuations.

Outcome

35%

improvement in predictive analytics.

Industry Challenge

Route Planning

Solution offered

The software considers variables such as traffic, weather, delivery windows, road closures and develops the best possible route.

Outcome

25%

improvement in cost saving.

Industry Challenge

Scalability & Flexibility

Solution offered

The software will grow with the business, as it expands so does the software.

Outcome

35%

faster scaling of operations.

Industry Challenge

Compliance & Accountability

Solution offered

The system is able to capture everything from time-stamped logs to digital Proof of Delivery (POD).

Outcome

50%

reduction in delivery disputes.

Industry Challenge

Seamless Communication

Solution offered

The LogiNext dispatch automation software is able to create centralized communication.

Outcome

25%

reduction in delivery delays

Industry Challenge

SLA Adherence

Solution offered

LogiNext uses predictive algorithms for accurate ETAs and dynamic dispatch planning.

Outcome

40%

reduction in dispatch planning time and improved SLA adherence.
