Top Benefits of Working With SaaS Than Building an In-house Platform

What is SaaS?

SaaS stands for Software as a Service. It's a service where the owner does not have to purchase a service but buy it on a lease (subscription).

85%
Organizations will use SaaS by 2025

$10Tr
Is the estimated global SaaS market size by 2030.

SaaS		In-house Software
There is no sale of the software but a subscription model.	Vs	Uses traditional software where it has to be purchased in the form of licenses.
Can be used only for a predefined period, by paying a monthly, quarterly or yearly fee	Vs	Usually built to be used for the lifetime with a one-time license fee.
The software is hosted and maintained by a third-party provider.	Vs	The servers and hardware are owned and managed by the organization.
SaaS applications can be accessed from any device with an internet connection through a web browser.	Vs	In-house software can be accessed from specific devices or through remote desktop solutions.
Maintenance and software updates (including bug fixes, security patches, feature enhancements, etc.) are undertaken by the SaaS provider.	Vs	In-house developed software requires hiring an experienced IT team for maintaining and updating the software on a timely basis.
