Smarter, Faster, Leaner Deliveries with LogiNext Restaurant Delivery Software

Did You Know?

Restaurants using unified delivery platforms see up to **35% faster order turnarounds and 20% higher repeat customer rates.**

| CHALLENGE	SOLUTION	OUTCOME
Slow Order Handoff & Kitchen-to-Driver Delays	Automated order batching, kitchen prep-time prediction & smart driver assignment.	**30%↑** Faster order readiness and smoother handoffs during peak hours.
Delivery Delays & Customer Complaints	Real-time driver tracking, dynamic ETAs & automated customer notifications.	**35%↑** Reduction in delay-related complaints and higher CSAT.
High Delivery Costs	Route optimization, multi-order clubbing & idle time reduction.	**20%↓** Lower cost per order without compromising service speed.
Lack of Visibility Across Aggregators + In-House Orders	Unified dashboard integrating Swiggy, Zomato, Uber Eats & direct channels.	**30%↑** More accurate demand forecasting and tighter operational control.
Missed SLAs & Inconsistent Delivery Quality	Automated SLA alerts, driver performance scoring & heat-map intelligence.	**25%↓** Improvement in SLA compliance across all outlets.
Manual Proofs, Settlement Delays & Revenue Leakage	Digital ePOD, auto-reconciliation & audit-ready delivery logs.	**25%↑** Faster settlements with fewer payout disputes.
Scaling Across Outlets Without Chaos	Cloud-native, API-first platform with plug-and-play POS integrations.	**3X↑** Outlet expansion capability without inflating ops teams.
